Re: Property at 1128 North Main Street, Providence, RI

Dear Mr. Svendson:

On December 17, 1992, a representative of this office witnessed an underground storage tank removal at the above referenced property. At that time, soil contaminated with petroleum caused by prior leakage or spillage was required to be stockpiled for off-site disposal at an approved facility.

In accordance with the Oil Pollution Regulations and Solid Waste Disposal Regulations this soil is categorized as "oil spill debris" and as such is a "special waste". These regulations require disposal within a period of thirty (30) days, or no later than **January 27, 1993**. Prior to transport to an approved disposal facility, the pile must be stored on and completely covered by thick gauge polyethylene or similar impervious material to prevent runoff and/or leachate, and to control odors. Documentation in the form of a receipt of the final disposal should be forwarded to this office no later than **February 2, 1993**, five (5) days after disposal.

Failure to comply with the above requirements will result in legal action, including penalties.

Any questions regarding this matter should be directed to the undersigned or Donna Pirri at (401)277-2234.

Sincerely,

Bruce Catterall, P.E.
Supervising Sanitary Engineer
